## Department Of Economics

---

The Bachelor of Arts (Economics) Degree program is designed to give our students a good starting point for their career and a whole new different perspective on everyday life. It provides broad intellectual training, providing the foundations of knowledge of how the economy works and helping the development of the relevant skills for the constructive use of that knowledge. The program is intellectually robust and of contemporary relevance. It will enhance students' understanding of a wide-range of economic issues; analytical decision-making skills; communication skills; and global awareness necessary to function in changing business, socioeconomic, and learning environments.

Study areas available include macroeconomics, microeconomics, and mathematics for economists, statistics, econometrics, monetary economics and banking, public finance, investment analysis, project management, managerial economics, environmental and natural resources economics, economic policy, agricultural economics, health economics, development economics, industrial economics, financial markets, international trade and finance, technology and development, and economic globalization.
